- **How we will deploy the task and note**

- After implementation we will test
- We will show the demo of the milestone before release on test server
- Every Task we will deploy approved by client
- After approval by client we will deploy the task on live server
- If any changes after delivery of milestone it will direct affect on second milestone release date.
- After release we will do the regression testing

- **We will required stuff from client and our assumption**

- Client will provide us **domain** name.
- Client will provide us the **cpanel server**.
- Client will provide us the website **content**.
- Client will provide us **logo/ video/graphics** which they want to install in system.
- Client will provide third party API like **Payment gateway/SMS gateway** etc

Client Should be approve below

| sr.no | Milestone | Expect Delivery Date | Expected Transection[INR] | Status |
|-------|-------------|----------------------|---------------------------|------------------|
| 1 | Milestone 1 | 20/01/2020 | 10,000 | Approve / Reject |
| 2 | Milestone 2 | 31/01/2020 | 20,000 | Approve / Reject |
| 3 | Milestone 3 | 09/02/2020 | 20,000 | Approve / Reject |
| 4 | Milestone 4 | 15/02/2020 | 20,000 | Approve / Reject |
| 5 | Milestone 5 | 20/02/2020 | 20,000 | Approve / Reject |

We will release all expected work on time we also expected the same from client have to deliver transaction on the same day.

@Note:After this release we will share the same milestone plan for android app.

- **List of features will available mobile app milestone**
 - Bidding etc

As per our discussion total cost of project as distributed as below.
